

# Getting Started with AccidentPlan

## 1. Check Your Device for Compatibility.

AccidentPlan is tested on:

- Apple iPhone versions 5 and above
- Samsung Galaxy S6 and above
- All Motorola Nexus products

(Other Android products may work, but we only test on the above devices).

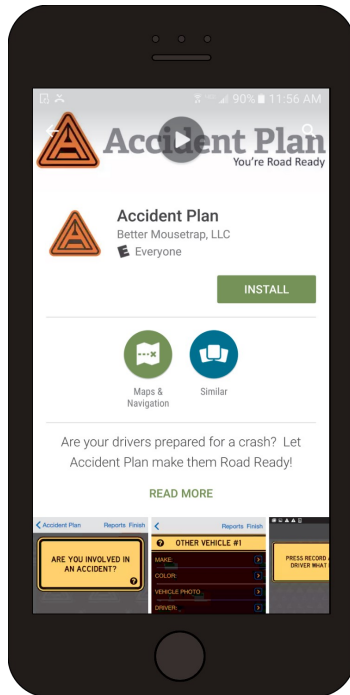

*AccidentPlan uses between 9MB and 16MB of data for its initial download.*

## 2. Get Connected First.

It's best to download all applications over Wi Fi; or at least a strong cell signal.

### 3. Download AccidentPlan from the App Store or Google Play.

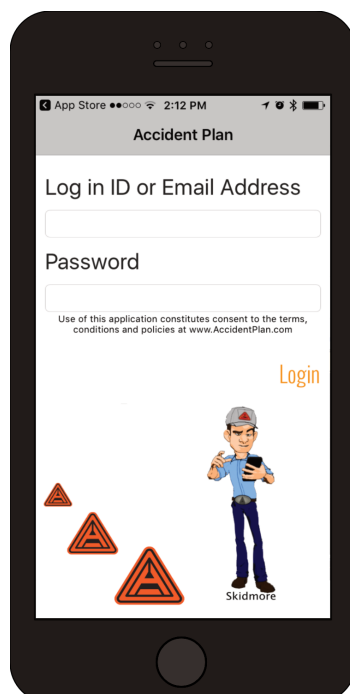

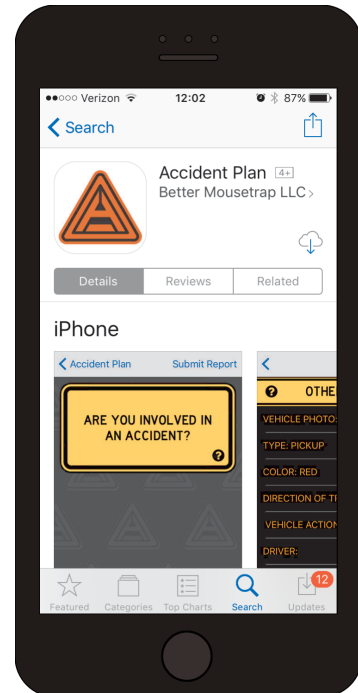

You can click the links provided in your subscription confirmation email.

Or go to your App store on your phone or tablet, search AccidentPlan.

It will display with our triangle.

### 4. Log Into AccidentPlan.

Use the icon to open.

Sign in with your user **USER ID** and **PASSWORD** provided with your subscription.

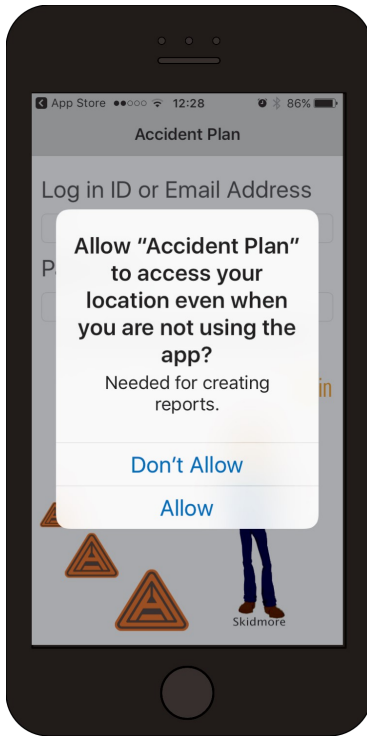

Please be patient.

You may see this on the screen for a moment while it loads.

## **5. Allow Permissions When Prompted.**

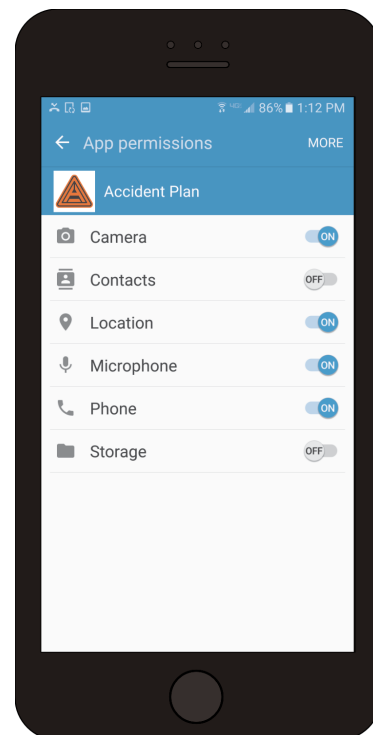

**In order to do its job, AccidentPlan needs to access your location, your camera and your microphone.**

**It also needs cellular data permission.**

**From either an iPhone or Galaxy, open *Settings* and scroll down to the list of apps at the very bottom.**

**Tap an app and you'll see the permissions it needs.**

**You can enable or disable individual permissions for specific apps from here.**

## 6. Train With Skidmore.

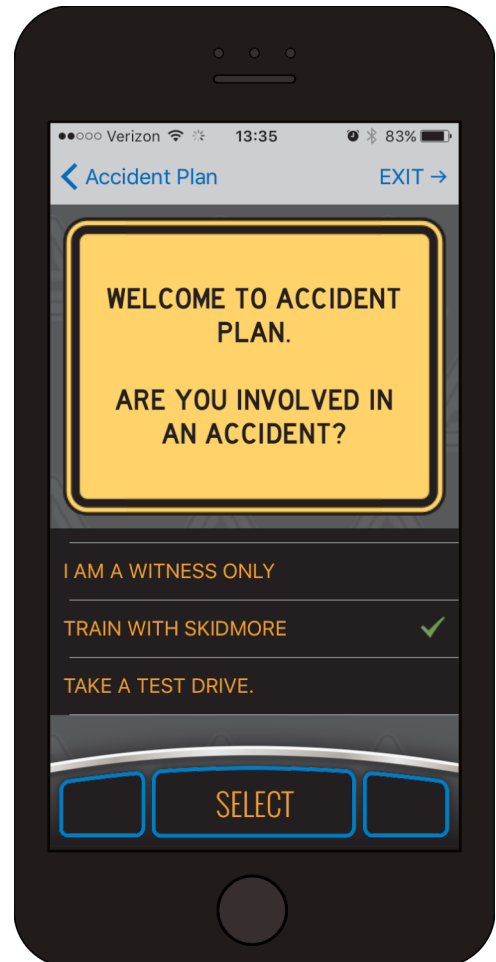

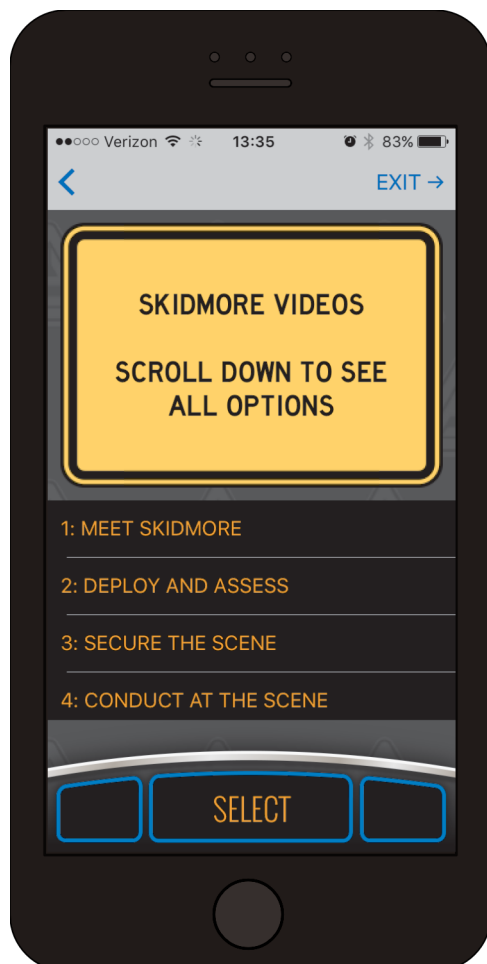

Once logged in, “*Open a new report*”.

Select “Train with Skidmore”

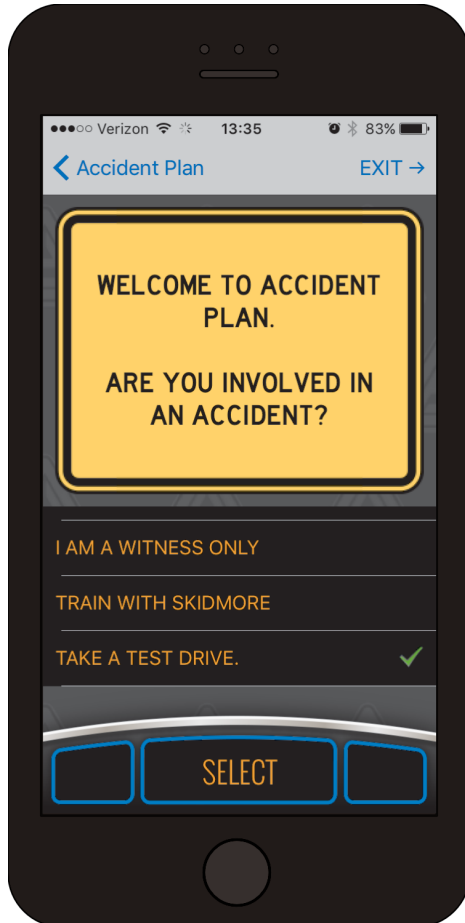

(We think you will like him).

Please watch all seven chapters and take each quiz.

It only takes about 12 minutes.

## **7. Take it for a Test Drive**

**Select “Take a Test Drive” and explore.**

**Remember to scroll and swipe and take a few pictures along the way.**

**Now you're *Road Ready*!**
